

LIMITED TERM U.S. GOVERNMENT FUND[^]

MUTUAL FUND

AS OF 3Q23

Investment Objective

The Fund seeks to maximize total return (capital appreciation and income) with minimal reasonable risk.

Investment Approach

The Fund seeks to primarily invest in U.S. government securities or its agencies with an average maturity between two and five years.

INVESTMENT PERFORMANCE % — AS OF 9/30/23

- Northern Funds Limited Term U.S. Government Fund
- Bloomberg 1-5 Year U.S. Government Index¹
- Morningstar Category Avg Short Government

Average Annual Returns

	Quarter	YTD	1-Year	3-Year	5-Year	10-Year	Since Inception
■ Fund	0.17	0.92	1.66	-2.25	0.46	0.39	2.27
■ Benchmark ¹	0.19	1.16	2.10	-1.86	0.90	0.80	2.79
■ Morningstar	0.21	1.27	1.87	-1.67	0.59	0.60	—

Performance quoted represents past performance and does not guarantee future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than that shown here. Performance data current to the most recent month end is available by calling 800-595-9111.

In the absence of applicable expense reimbursements and fee waivers, fund performance and returns since inception and dividends would have been reduced. Total return is based on net change in NAV assuming reinvestment of distributions.

*The 30-Day SEC Yield w/waivers represents the annualization of the Fund's net investment income, excluding capital gain income and includes contractual expense reimbursements. It would be lower without those reimbursements. Negative 30-Day SEC Yield results when accrued expenses of the past 30 days exceed the income collected during the past 30 days. The 30-Day SEC Yield w/o waivers represents the annualization of the Fund's net investment income, excluding capital gain income and excludes contractual expense reimbursements, resulting in a lower yield. Negative 30-Day SEC Yield results when accrued expenses of the past 30 days exceed the income collected during the past 30 days.

Please see following pages for calendar year returns, index definitions and investment terms.

[^] The Board of Trustees of Northern Funds approved, effective February 1, 2022, the name changes of the Short-Intermediate U.S. Government Fund to the Limited Term U.S. Government Fund.

DISCLOSURE

All data is as of date indicated and subject to change.

¹ Bloomberg 1-5 Year U.S. Government Index is an unmanaged index of debt securities including all public obligations of the U.S. Treasury and all publicly issued debt of U.S. government agencies with maturities of one to five years. It is not possible to invest directly in an index.

NORTHERN FUNDS
LIMITED TERM U.S. GOVERNMENT FUND

DEFINITIONS AND RISKS

Characteristics: Benchmark and Fund analytics have been calculated using a third party vended model. All material has been obtained from sources believed to be reliable, but the accuracy, completeness and interpretation cannot be guaranteed. Information contained herein is current as of the date appearing in this material only and is subject to change without notice. Certain benchmark calculations may not match the published benchmark characteristics.

Distribution Calculations: All distribution calculations (Maturity Distribution, Sector Weightings and Quality Distribution) are measured on a trade date basis and are adjusted for uninvested cash from the market value used to compute the percentage calculations.

Effective Duration: Effective Duration measures percent change in price for 100 basis point parallel shift.

Quality Distribution: Credit quality ratings are based on Moody's, Standard & Poor's and Fitch ratings. If ratings from all three rating agencies disagree, the security is assigned the middle rating. If two of the three agree, the security is assigned the rating from those two. If two of these rating agencies have assigned different ratings, the security is assigned the lower rating from those two. If none of these three rating agencies have assigned a rating, the security is assigned a rating of not rated. The ratings, expressed in Standard & Poor's nomenclature, range from AAA (extremely strong capacity to meet its financial commitment) to D (in default). Short-term ratings, when applicable, are expressed in Standard & Poor's nomenclature, range from A-1 (obligors capacity to meet its financial commitment on the obligation is strong) to A-3 (exhibits adequate protection parameters). The ratings represent the rating agencies opinions of the quality of the securities they rate. Ratings are relative and subjective and are not absolute standards of quality.

Bond Risk: Bond funds will tend to experience smaller fluctuations in value than stock funds. However, investors in any bond fund should anticipate fluctuations in price, especially for longer-term issues and in environments of rising interest rates.

Investment Company Risk: The risk that the Fund will be subject to the risks associated with investments in registered investment companies, including ETFs (together, "Underlying Funds"), such as the possibility that the value of the securities or instruments held by the Underlying Funds could decrease. In addition, passively managed Underlying Funds may not track the performance of their respective reference assets and may hold troubled securities or other investments. Investments in Underlying Funds may involve duplication of management fees and certain other expenses, as the Fund indirectly bears its proportionate share of any expenses paid by the Underlying Funds in which it invests. Further, investments in ETFs are subject to the following additional risks: (1) an ETF's shares may trade above or below its net asset value; (2) an active trading market for the ETF's shares may not develop or be maintained; and (3) trading an ETF's shares may be halted by the listing exchange. NTI may be subject to potential conflicts of interest with respect to investments in affiliated Underlying Funds, which are Underlying Funds managed by NTI or its affiliates, because the fees paid to NTI by some affiliated Underlying Funds may be higher than the fees paid by other Underlying Funds.

Mortgage-Backed Securities Risk: Mortgage-backed investments involve risk of loss due to prepayments and, like any bond, due to default. Because of the sensitivity of mortgage-related securities to changes in interest rates, the Fund's performance may be more volatile than if it did not hold these securities.

U.S. Government Guarantee: U.S. government guarantees apply only to the underlying securities of a Fund's portfolio and not the Fund's shares.

US Government Risk: The risk that the U.S. government will not provide financial support to its agencies, instrumentalities or sponsored enterprises if it is not obligated to do so by law. Certain U.S. government securities purchased by the Fund are neither issued nor guaranteed by the U.S. Treasury and, therefore, may not be backed by the full faith and credit of the United States. The maximum potential liability of the issuers of some U.S. government securities may greatly exceed their current resources, including any legal right to support from the U.S. Treasury. It is possible that the issuers of such securities will not have the funds to meet their payment obligations in the future.

Please carefully read the prospectus and summary prospectus and consider the investment objectives, risks, charges and expenses of Northern Funds carefully before investing. Call 800-595-9111 to obtain a prospectus and summary prospectus, which contain this and other information about the funds.
