

NORTHERN FUNDS

STOCK INDEX FUND (NOSIX)

As of 12/31/19

FUND COMMENTARY

In the fourth quarter of 2019, large-cap equities as measured by the S&P 500 Index (Fund Index) returned 9.07%, slightly outperforming small-cap equities as measured by the S&P 600 Index, which returned 8.21%.

Within the Fund Index, the top-performing sectors over this time period were information technology and health care, returning 14.40% and 14.36%, respectively. Real estate and utilities were the worst-performing sectors for this quarter, with returns of -0.54% and 0.75%, respectively.

The Stock Index Fund returned 9.03% for the quarter, compared to its benchmark, the S&P 500 Index which returned 9.07%. The market capped off 2019 with a strong fourth quarter, rising more than 9% as measured by the S&P 500 Index. Trade tensions between the U.S. and China eased as a "Phase One" deal between the two nations was announced. Progress in trade talks along with steady economic numbers provided a tailwind for investor confidence. Credit spreads narrowed, oil prices moved higher, treasury yields increased, and the yield curve steepened during the quarter as investors embraced the risk-on environment. Health care was one of the best-performing sectors, benefitting from lower perceived political risk in the 2020 U.S. elections. Information technology and financials sectors also outperformed, aided by the positive trade outlook and steepening yield curve, respectively. Defensive and higher-yielding sectors such as a utilities, real estate, and consumer staples lagged the overall market, negatively impacted by rising bond yields and the increasing investor risk appetite.

Please remember that all investments carry some level of risk, including the potential loss of principal invested. They do not typically grow at an even rate of return and may experience negative growth. As with any type of portfolio structuring, attempting to reduce risk and increase return could, at certain times, unintentionally reduce returns.
