

THE NT WORLD SMALL CAP ESG LOW CARBON INDEX FEEDER FUND

Investment Objective

The Fund is a UCITS feeder fund. The Funds' investment objective is to invest at least 85% of its assets in the Northern Trust World Small Cap ESG Low Carbon Index Fund (the "Master Fund") a Sub-Fund of the Northern Trust UCITS Common Contractual Fund, the investment objective is to closely match the risk and return characteristics of the MSCI World Small Cap Custom ESG Low Carbon Index (the "Index") with net dividends reinvested and to exclude securities that do not meet certain environmental, social and governance (ESG) criteria whilst seeking a reduction in carbon intensity and potential emissions from fossil fuels relative to the Index. The Master Fund invests in equities (that is, shares and other similar kinds of assets) issued by or relating to companies included in the Index.

The Index is a custom index which corresponds with the MSCI World Small Cap Index with the exclusion of companies not considered to meet socially responsible principles identified by applying criteria that refer to the UN Global Compact ten principles, as well as other ESG criteria selected by the Investment Manager.

Target Market: This Fund is appropriate for investors looking to invest over the medium to long term; and are looking for a passively managed investment in the relevant market(s) with ESG principles implemented according to a defined set of exclusions as well as assessment of ESG ratings.

RISK WARNINGS

Liquidity Risk – Some recognised exchanges are less liquid or more volatile which may affect the price received and time taken when selling investments. Small capitalisation companies are also less liquid and this may result in fluctuations in the price of shares.

Investment Risk - An investment in the Fund involves investment risks including possible loss of the amount invested.

Counterparty Risk - In case of bankruptcy of the broker, there is no guarantee collateral held by the broker will be returned to the Fund. In the event of bankruptcy of the counterparty, the premium and any unrealised gains may be lost.

Derivative Risk - Derivatives may result in gains or losses that are greater than the original amount invested.

Valuation Risk - A position in the Fund may be valued incorrectly, as some prices may be uncertain at a point in time.

Currency Risk - Where a class of shares are in a currency other than the base currency of the Fund, the non-base share classes of the Fund may be affected unfavourably by fluctuations in currency rates.

Risks associated with investing in the Master Fund - The value of this Fund and the income from it is closely linked to the performance of the Master Fund. There is no guarantee that the investment objective of the Master Fund will be achieved. As a unitholder of the Master Fund, this Fund bears, along with other unitholders, its pro rata portion of the expenses of the Master Fund. These fees are in addition to the other fees and expenses which this Fund bears directly in connection with its own operations.

CARBON DATA METRICS

Carbon footprint of the index constituents versus parent

Potential carbon emissions are emissions of fossil fuel companies that can be potentially released should all the fossil fuel reserves they own be extracted. This field represents the potential carbon emissions of the fossil fuel reserves owned by a company using a formula from the Potsdam Institute for Climate Impact research. Carbon intensity represents the company's most recently reported or estimated Direct (fuel combustion, company vehicles) and Indirect (purchased electricity heat and steam) greenhouse gas emissions.
