

GROWTH WITH ENHANCED INCOME

SEEKING CAPITAL APPRECIATION AND ENHANCED CURRENT INCOME

The Growth with Enhanced Income Portfolio combines Northern Trust Asset Management’s asset allocation, portfolio construction and risk management expertise with quality dividend-paying equities and active fixed income strategies in an effort to provide a globally diversified, risk-efficient solution that combines capital appreciation with an enhanced level of current income.

1 DIVERSIFICATION

2 ENHANCED INCOME

3 EFFICIENCY

Global Diversification with Tactical Asset Allocation

Strategically allocates to asset classes beyond traditional developed-market stocks and investment-grade bonds, such as high yield fixed income and real assets. These asset classes:

- 1) have historically exhibited a low correlation with traditional stocks and bonds, which may reduce volatility
- 2) are included in an effort to help the level of income keep up with inflation

Northern Trust’s time-tested dynamic asset allocation process seeks to add value by exploiting near-term financial market opportunities. Asset allocation adjustments may be made as frequently as monthly, within parameters, in an effort to ensure the strategy maintains its growth with enhanced income profile.

Enhanced Income

The strategy is designed to generate excess income as compared to a balanced cap-weighted indexed portfolio and emphasizes higher-income producing investments such as:

- 1) Higher dividend-producing equities with additional quality screens to help control downside risk
- 2) Real assets that provide a globally diversified source of income that may help keep up with inflation
- 3) Investment grade, corporate, high-yield and mortgage-backed bonds that provide additional income as compared to Treasuries

The Growth with Enhanced Income portfolio is built with factor-based, cost-efficient FlexShares® Exchange Traded Funds (ETFs)

Professionally managed by our team of investment experts, this portfolio is designed to provide:

- 1) Cost- and tax-efficiency
- 2) Factors such as quality, dividend yield and value, which have historically outperformed passive index strategies¹
- 3) Factors built to take compensated risks while minimizing unintended consequences

All securities investing and trading activities risk the loss of capital. There is no assurance that any of the securities discussed herein will remain in a portfolio at the time you receive this report or that securities sold have not been repurchased. Each portfolio is subject to substantial risks including market risks, strategy risks, adviser risk and risks with respect to its investment in other structures. There can be no assurance that any portfolio investment objectives will be achieved, or that any investment will achieve profits or avoid incurring substantial losses. No investment strategy or risk management technique can guarantee returns or eliminate risk in any market environment. Risk controls and models do not promise any level of performance or guarantee against loss of principal. Any discussion of risk management is intended to describe Northern Trust's efforts to monitor and manage risk but does not imply low risk.

Forward-looking statements and assumptions are Northern Trust's current estimates or expectations of future events or future results based upon proprietary research and should not be construed as an estimate or promise of results that a portfolio may achieve. Actual results could differ materially from the results indicated by this information.

There are risks involved in investing including possible loss of principal. There is no guarantee that the investment objectives of any fund or strategy will be met. Risk controls and models do not promise any level of performance or guarantee against loss of principal. FlexShares™ ETFs are sub-advised by Northern Trust Investments, Inc. For more information on the investment objectives, principle risks, and fees associated with these Funds, please see each Fund's prospectus and statement of additional information ("SAI"), which are available on the Advisors' websites at flexshares.com.

Northern Trust generally utilizes its own funds within this strategy. Northern Trust receives various fees from the funds via the fund expense ratios. Clients will incur these fees. Clients who access these portfolios through a financial intermediary firm will typically pay additional fees to that firm. Clients should speak to their Financial Advisor for more information. Financial intermediaries that employ Northern Trust for model management or overlay services may compensate Northern Trust for those services a fee of up to 0.15%.
